HOW TO BUY?

NAV-X Commissions can be added to your Client's license by adding the granule in Partner Source.

NAV-X Commission Management app that is integrated into Microsoft Dynamics NAV. You may now automate your NAV-X commission calculations. There is no need to spend countless hours each month (financial period) trying to calculate commissions. The program has the flexibility to work within your business requirements. Focus your extra time on strategy and sales as opposed to manually managing commissions. Our program even allows for your sales professionals to review their own data and free you up from fielding questions on their "deals". This way, they trust the numbers and will focus more time on selling and less time examining their commission payments.

How do you calculate your commissions today? Is it on Gross Profit (GP)? Sales revenue? Our NAV-X Commissions app can now easily track the real-time data in Dynamics NAV. By working within the Dynamics 365 product, NAV-X Commissions provides you with reports, statistics, as well as sales that you have paid and what is pending for the next processing run. The ability to having real-time information will eliminate countless hours of manual cross checking and hash marks.

Relax...We have you covered. With real-time reports, you will can see your business rules in action. NAV-X Commissions can calculate various formulas for you. Need to adjust the cost of the product to ensure commissions are properly accounted for? No Problem. Our NAV-X Commissions engine will adjust commissions based upon changes to inventory cost adjustments made within Dynamics NAV.

ABOUT NAV-X LLC

NAV-X, with its roots deep in the rich history of Microsoft Dynamics NAV in the North American market, is a publisher of functionality commonly required by distribution and manufacturing businesses, but unavailable in native NAV. Since 1996, our team has been developing this functionality and built a codex of Best Practice solutions. These solutions provide our partners and their clients with reliable and repeatable competitive advantages.
