# Transparent Processes, Flexible to Use and Highly Responsive

## Support by Intelligent Workflows

Companies can individually decide which business processes they want to show in a detailed form and which of them to be supported by workflows. You can freely specify the event or start condition to initiate the workflow. By setting up workflows, you can both optimize your business processes and prioritize critical tasks and procedures.

You can easily set up and get started with agilesWorkflow, without the need of any technical know-how. This way, you will gain instant control of your processes.

agilesWorkflow automatically initiates the associated workflow when a particular event or scenario occurs in your processes. The system notifies the users in a timely manner on the required tasks and provides all relevant information they need to perform the assigned tasks.

## Continuous control – at any place, at any time

With agilesWorkflow in Microsoft Dynamics NAV, you always have the big picture of the current workload and remaining tasks. View these directly in your personal on any device, whether it is a tablet, a laptop, or a PC.

Thanks to the integration into Microsoft Outlook, users are automatically notified by e-mails on certain topics and their priorities.
